3/1/06	R93-04-003	Commission Order Instituting Rulemaking on Commission's own motion to govern open access to bottleneck services and establish a framework for network architecture development of dominant carrier networks and
	I93-04-002	Commission Order Instituting Investigation on the Commission's own motion into open access and network architecture

development of dominant carrier networks.

**Summary:** On February 27, 2006, Nick Selby, counsel for XO Communications Services, Inc. (XO), met on behalf of XO and on behalf of Cbeyond Communications, LLC, Covad Communications Company, Mpower Communications Corp., Navigator Telecommunications, LLC, and The Utility Reform Network with Cmmr. Bohn in San Francisco. Also present were Robert Lane, advisor to Cmmr. Bohn, and Terry Murray, cost expert for XO. Written material (attached to the notice) was used. Murray addressed what appears to be a miscalculation in the draft decision's (DD) 'Escutia' pages adopting a beta of 1 for the CAPM cost of equity. Murray also addressed the multiple reasons why Verizon California Inc. (Verizon) is mistaken in claiming that the capital structure used for calculating its cost of money should have a 75 percent equity component. Murray and Selby stated that the DD correctly determined that the equity component in the target capital structure for UNE cost calculation purposes should be 66.44%. Murray and Selby explained that Verizon's reliance on a federal district court decision was misplaced.
